

SCINT 2024

17th International Conference on
Scintillating Materials & their Applications

SUMMER SCHOOL

The primary goal of this school is to provide PhD students and young researchers with an advanced understanding of the principles and applications of scintillators. The program covers fundamental scintillation mechanisms as well as advanced concepts.

At the end of each day, social events will be organized to promote social interaction and the inclusion of young researchers in our scientific community.

During the School, the participants will have the opportunity to present a poster and a short oral presentation of their research work.

Period

The school will be held on Saturday July 6th and Sunday July 7th (two full days) just ahead of SCINT conference.

Registration

The summer school is free of charge for all the participants.

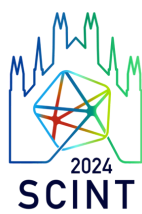

Moreover, for those also registered at the SCINT 2024 conference, coffee-breaks, lunches, and social events are included.
