

Ph.D. Course in Materials Science and Nanotechnology

University of Milano-Bicocca, Department of Materials Science, via Cozzi 55, 20125 Milano

November 5, 2019 – 2.30 p.m.

Seminar room - Department of Materials Science U5

Elena Belsole

Chief Editor of Communications Physics at Nature Research

Maximising the impact of your research

The publication and dissemination of research findings remains at the heart of personal academic impact and the impact that any research has in advancing science. In this talk I will provide a brief overview on how authors, particularly early career researchers, can maximise their chances of getting published in the best journal for their work and hence maximising its impact, and I will discuss the role of scientific editors and publishers in this process.

PhD students and all interested in the seminar are kindly invited to participate.

The PhD Coordinator
Prof. Marco Bernasconi
